Demand, supply and equilibrium

Synthetic teaching material · authored for this prototype

Slide 1 · build A

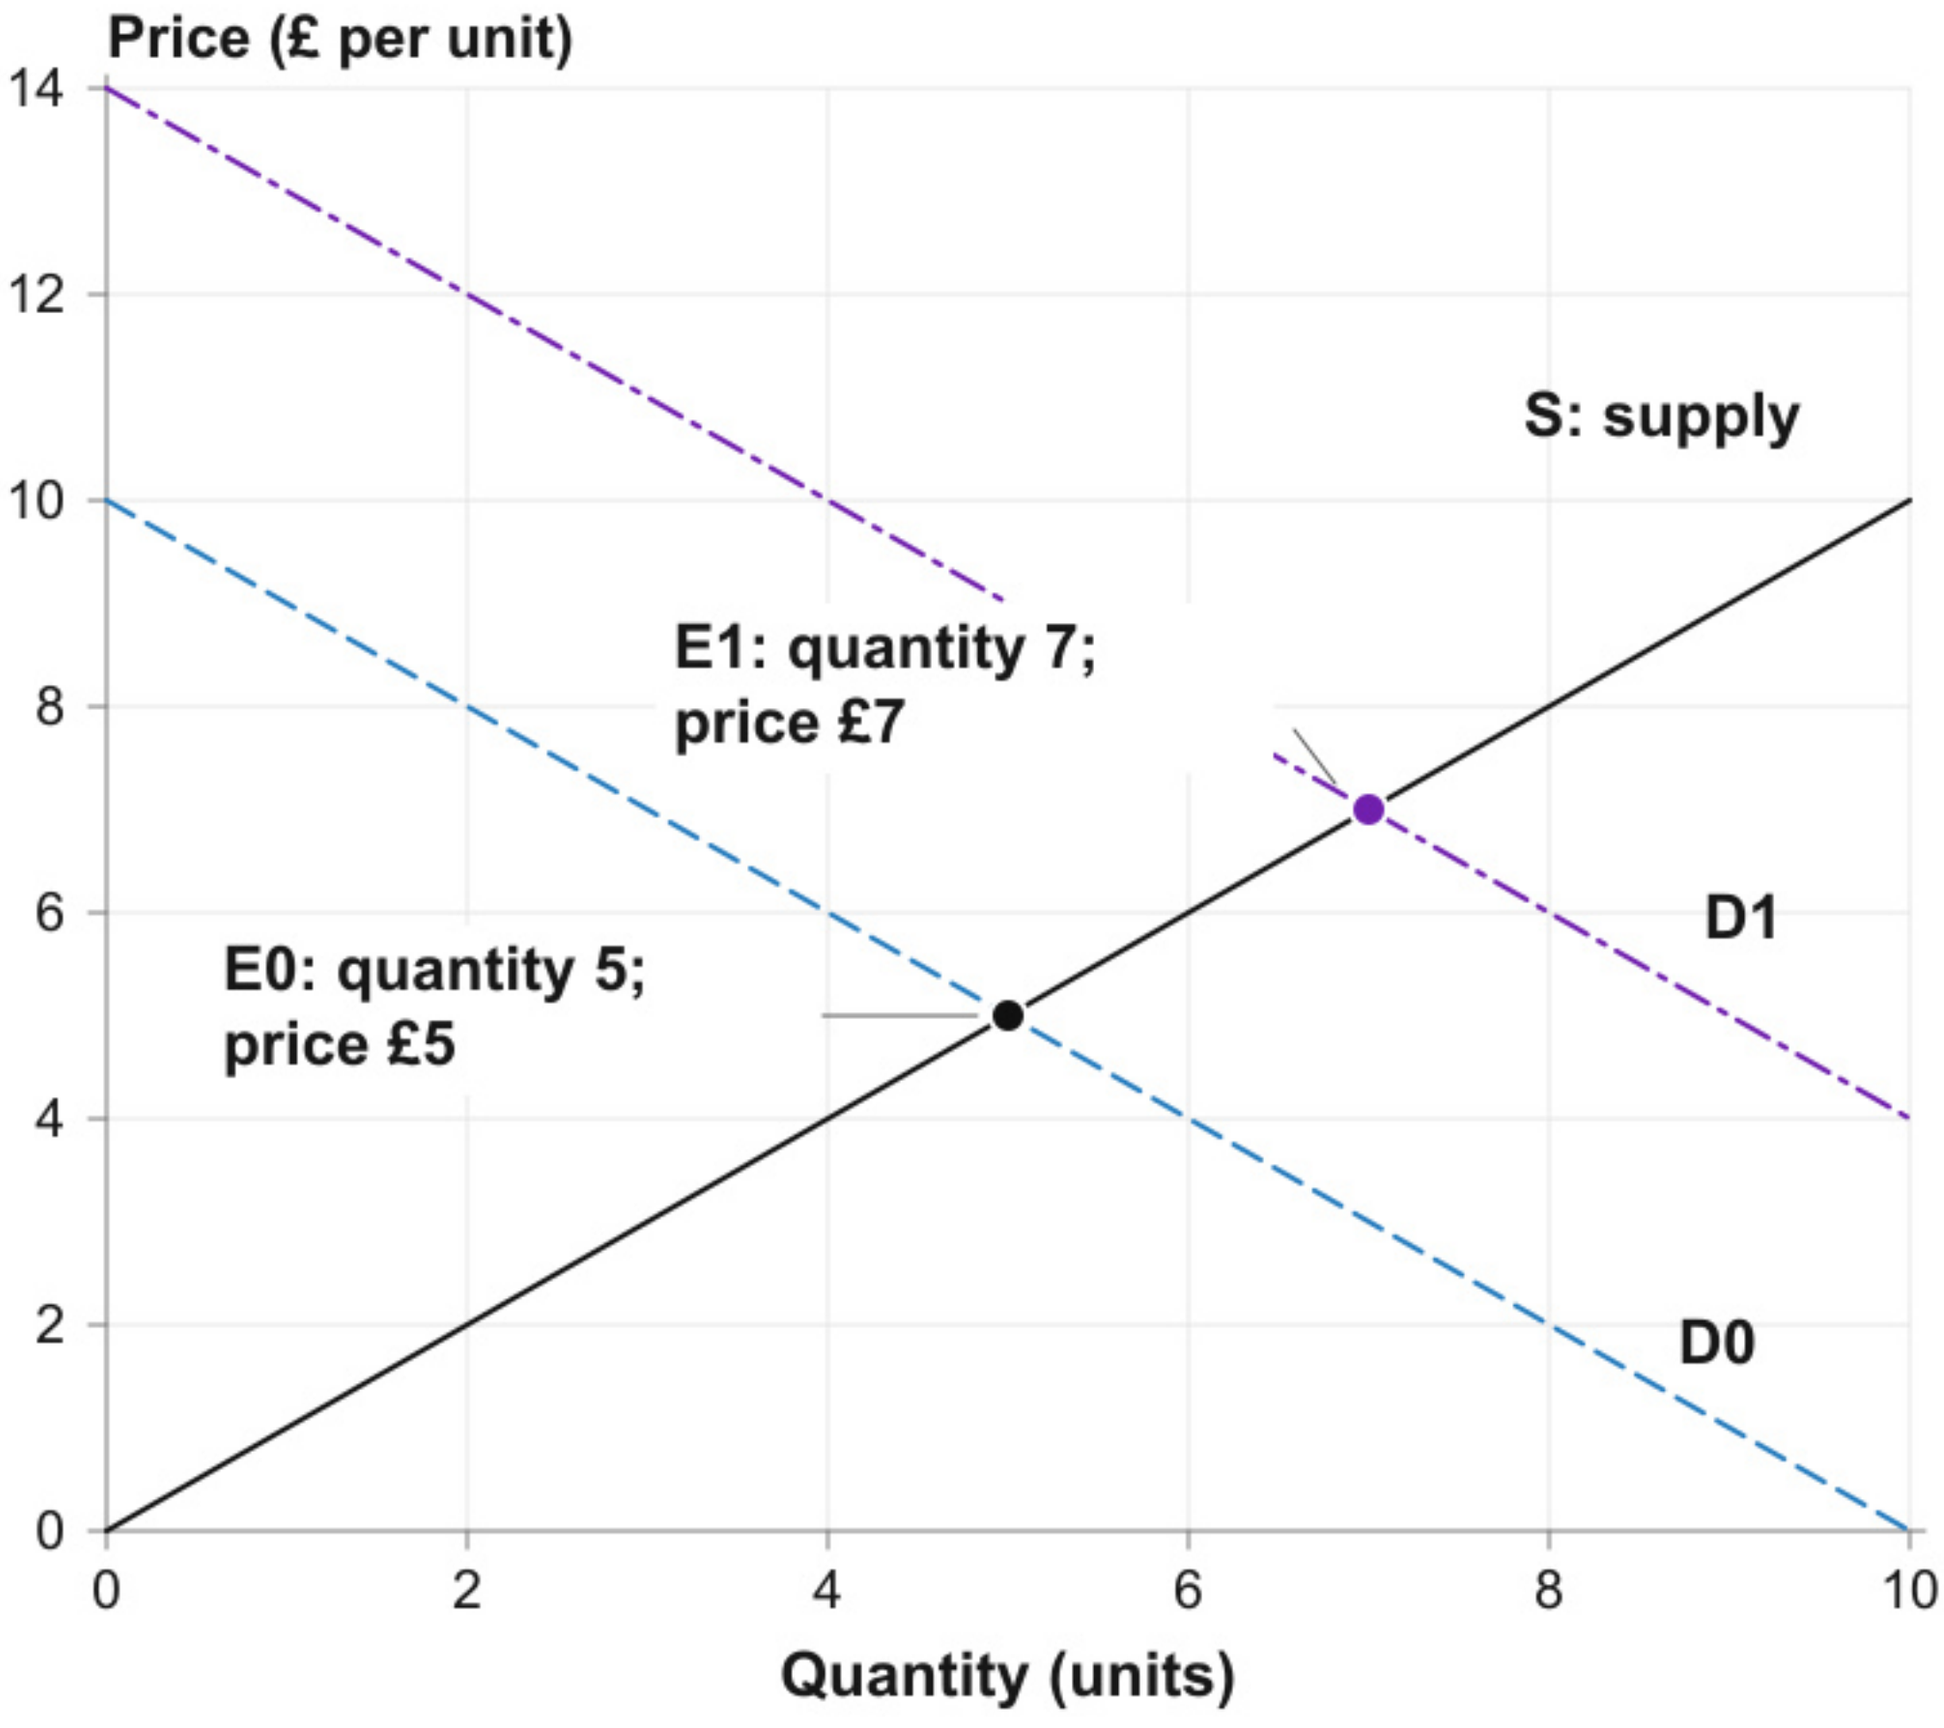

Illustrative model: supply unchanged

Demand, supply and equilibrium

Synthetic teaching material · authored for this prototype

Slide 1 · build B

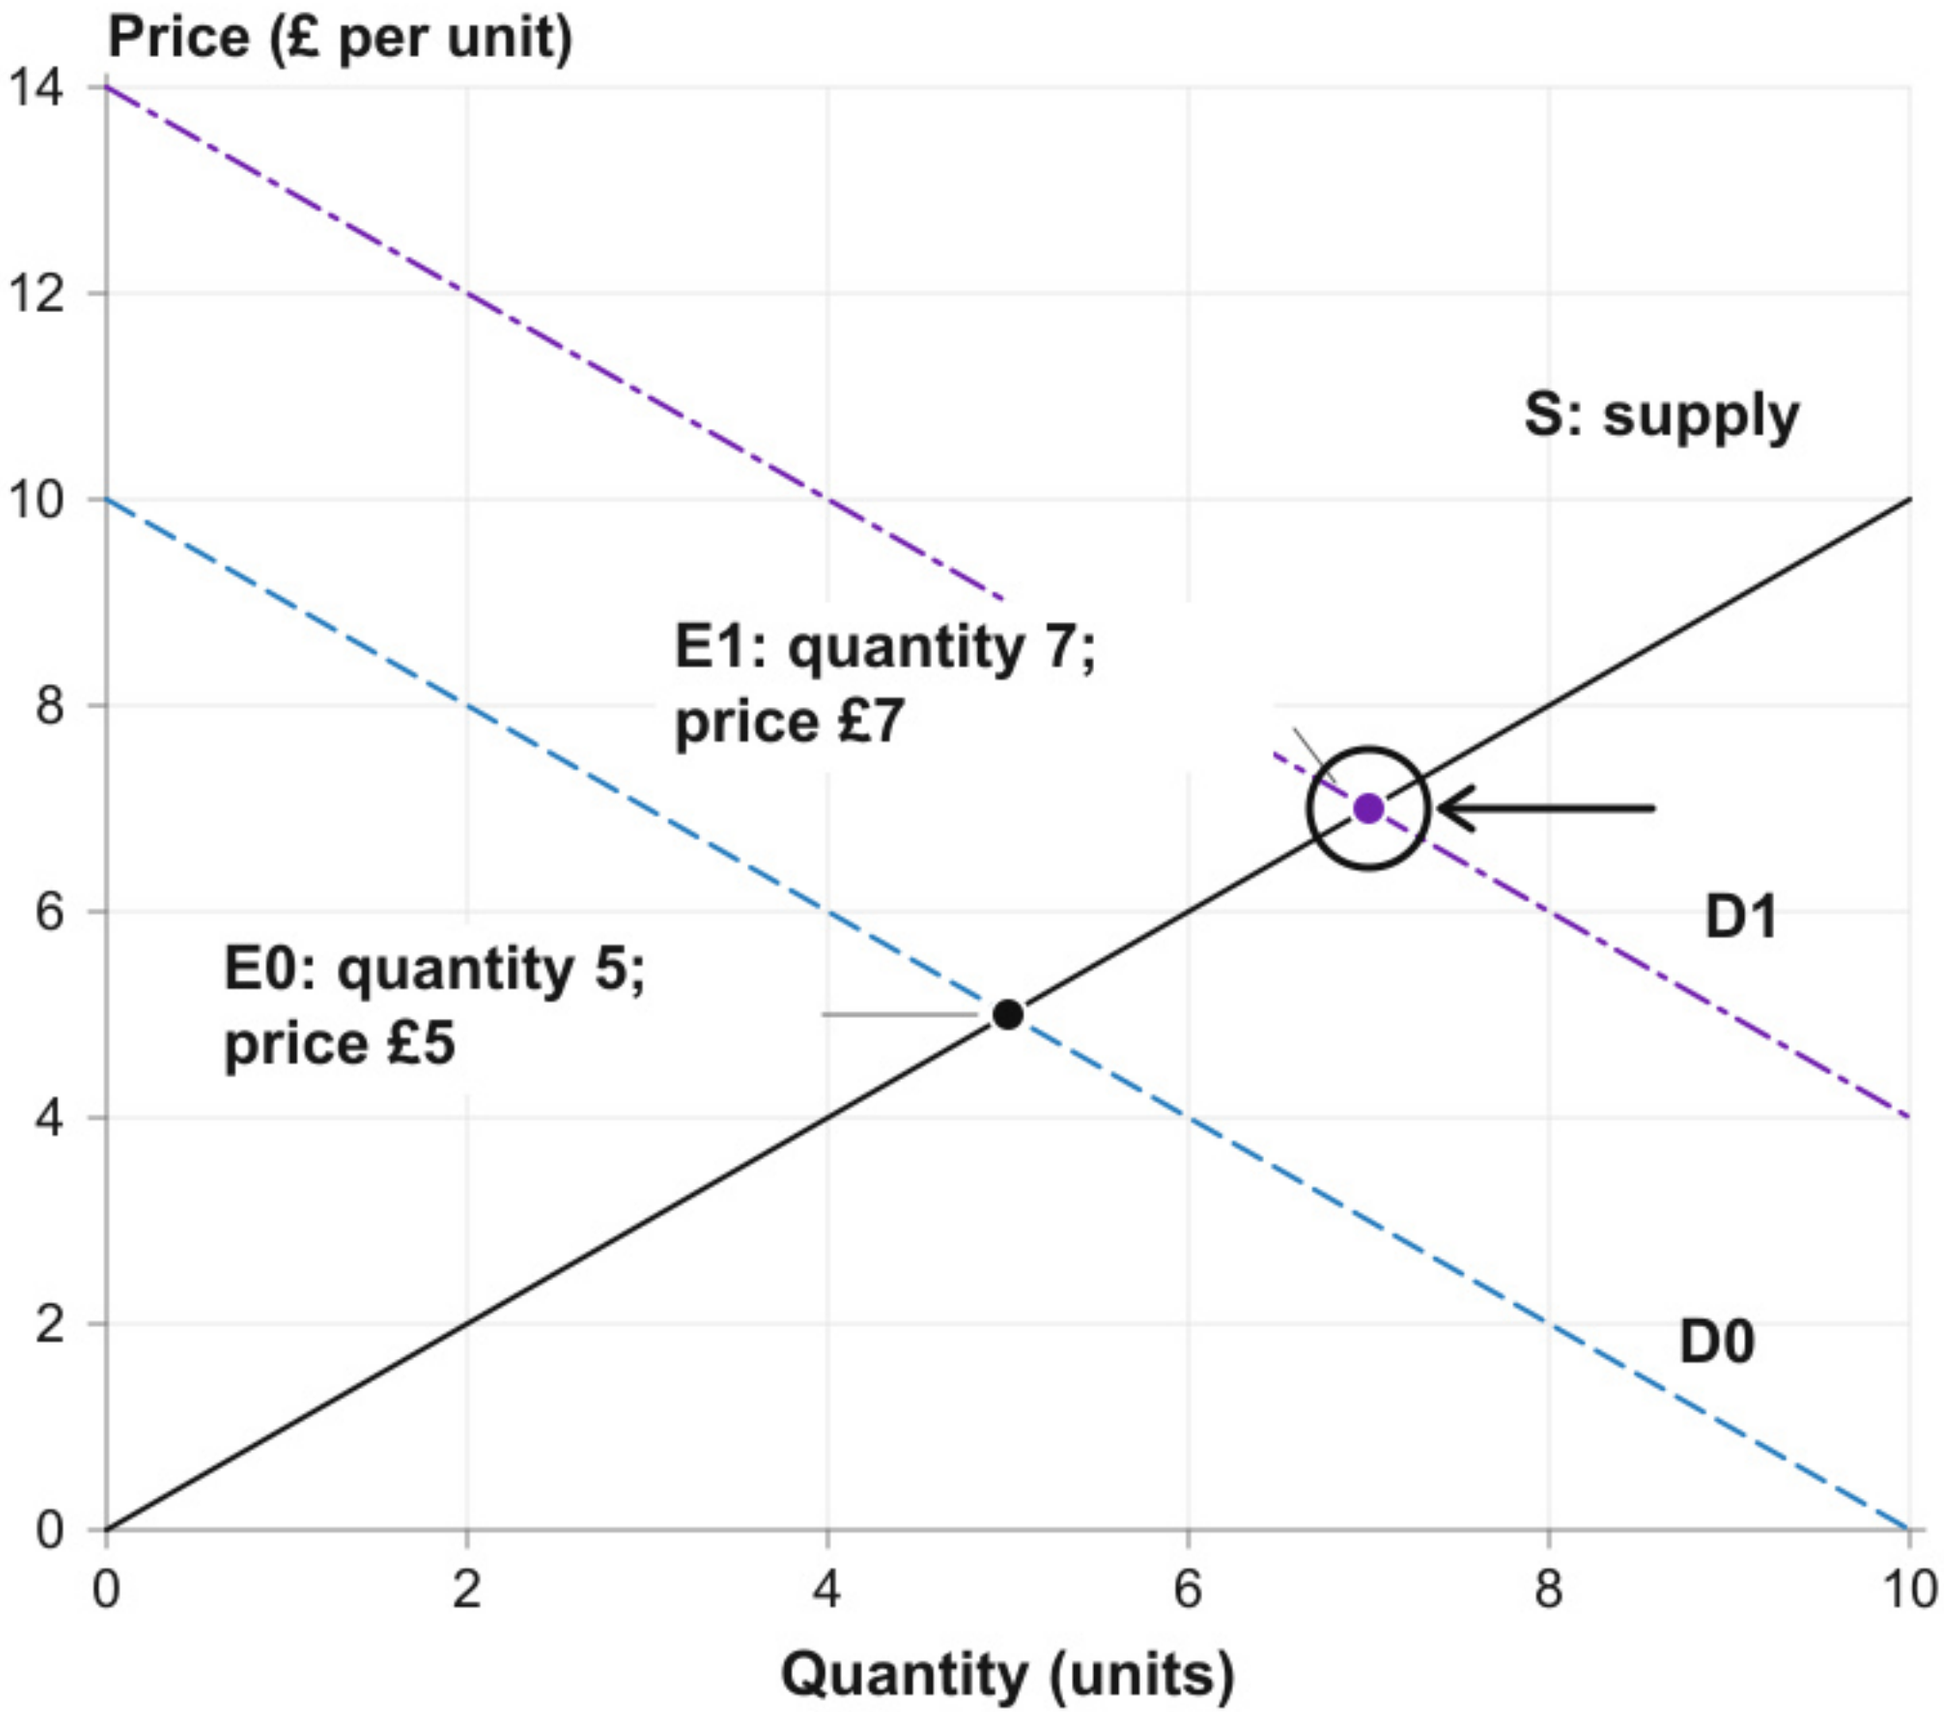

More buyers; other demand determinants unchanged

Demand, supply and equilibrium

Synthetic teaching material · authored for this prototype

Slide 1 · build C

More buyers; other demand determinants unchanged

Grouped algebraic ratio

Synthetic teaching material · authored for this prototype

$$r = \frac{(a + b)}{(c - d)}$$

Numerator (whole sum)

Denominator (whole difference)

Assume $c \neq d$

No numerical values are supplied.
